

Product Name:

GREENFORCE LAWN WEED & FEED

Contents:

Contains Mecoprop-P and Dicamba as the potassium salts in a soluble concentrate as well as a Nitrogen fertiliser solution

Use:

Controls most major lawn weeds including clover, while also giving a feed to the lawn, without producing excess grass for cutting. For maximum effect spray when the weeds have adequate leaf area to absorb the chemical. Following spraying, leave the sprayed area uncut for as long as practicable, to allow the chemical sufficient action to be absorbed from the leaf and throughout the plant to the roots.

General Description:

Greenforce Lawn Weed & Feed is designed to control all major lawn weeds including clover. Use Greenforce Lawn Weed & Feed on lawns which are actively growing from Spring to late Autumn.

Rates of Application:

Use a clean knapsack or watering can fitted with a fine rose. Cover vegetation without run-off. Apply Greenforce Lawn Weed & Feed at the rate 25ml per 25m² in 2½ - 5 litres of water.

Measure cap supplied

Product Code	Pack Size	Number per Outer	Area covered	Bar Code
P2276	1L	12	500m ²
