

LAWN FEED WEED & MOSSKILLER

Contents: Nitrogen (N) 10; Phosphorus (P) 2; Potassium (K) 4; Ferrous Sulphate 16.2% W/W
Weedkillers: Dicamba and Mecoprop-P

Directions for Use

When to Use - Apply GREENFORCE LAWN FEED WEED & MOSS KILLER, during the growing season from early Spring (April). Re-treatment may be necessary for heavy moss infestation or if moss returns. Ideally do not apply for 4 days before mowing and 3 days after. Apply product on a still day, when lawns are growing actively and the soil is moist. Do not use during drought or freezing conditions.

Application rate: Apply 20g per m² evenly over the surface. For accuracy and evenness of coverage, mark out the area to be treated using string or canes.

After Application - Your lawn should thicken and become a rich green colour. Total weed control may take around 4 -5 weeks. Some weeds may grow vigorously at first and become distorted and twisted. The moss in the lawn will blacken as it dies (any blackening of the grass is only temporary). After 7-14 days rake out the dead moss

General Advice - Avoid walking on treated areas until it rains or the product has been watered in. If no rain falls within 2 days, water the lawn thoroughly, so as to allow the product to work. Once the product is fully watered in, children and pets need not be excluded. **Disposal of Lawn Clippings:** For mulching do not use the first three mowings after treatment. After six months of thorough composting, they will be safe to use. **Drift:** Avoid drift onto vegetables, flowers and all neighbouring vegetation. In addition, staining and discolouration can occur if the product comes in contact with paving, concrete slabs and clothing etc. If this occurs, clean off immediately. **Newly Sown Lawns:** All newly sown lawns / laid turf must be established for twelve months. **Bulbs:** GREENFORCE LAWN FEED WEED & MOSS KILLER can be applied where bulbs are growing in the lawn, provided it is applied after all the bulb foliage has died down naturally.

GREENFORCE LAWN FEED WEED & MOSS KILLER contains three products, which work together.

1. Lawn Fertiliser - feeds the grass, for a lush healthy lawn.
2. A combination of two herbicides (Dicamba and Mecoprop-P), eliminating the weeds.
3. Ferrous Sulphate, eliminating the moss, causing it to blacken and die.

Product Code	Pack Size	Bar Code
G21022	15kg – (750 m ² .)	5390182201225
P21028	3Kg – (150 m ²)	539018221028

PRECAUTION

Use plant protection products safely. Always read the label and product information before use - **Pay Attention to the risk indications and follow the safety precautions on the label**
