Trusted innovators since 1939

www.hygeia.ie

Award winning innovation since 1939

For 85 years, we have been producing trustworthy, reliable and high performing brands for the gardencare, agricultural, amenity and animal care markets in Ireland and the UK.

We are committed to continued research and development ensuring we are producing best in class products to accommodate our customers' needs while continuing to innovate to meet market demands.

Sustainability is at the key of all of our product development. Not only do we look for more environmentally friendly packaging and manufacturing solutions on a continually basis, but we also strive to develop brands that support the customers choice to be more sustainable, with our natural and seaweed based products across all categories.

At Hygeia, we remain committed to providing optimum customer service and support for all of our valued business partners and direct customers.

Hygeia's History

In 1939, Dr Donny Coyle had a vision. As a vet and entrepreneur, he knew that more cereal would have to be grown to meet the demands of the impending Second World War and that these seeds would need to be treated to protect them and ensure maximum yields.

He founded Hygeia to provide a much needed solution for the Irish farmer to protect crops and livestock. He succeeded in that goal and now 85 years later the company is still thriving having expanded into the gardencare and animal care sectors.

We continue to innovate and adapt to the market, with decades of expertise, research and development at the heart of everything we do. While still a family owned company, it is clear to see that Hygeia has never stood still. We have continued to move with consumer demand and have anticipated and responded to changes in the marketplace. We have developed a sophisticated online presence and attractive consumer branding to support our high-quality and proven effective garden care products.

From our beginnings as a seed treatment facility, we are now a highly respected and well-established consumer brand with a number of market leading products in the Irish market and, more recently, the UK. With a large manufacturing and packaging facility on the outskirts of Galway City and a professional production facility, we are dedicated to creating products of the utmost quality. Innovation, quality and excellence are the core attributes that Hygeia works to.

Thompson & Morgan

Experts in the garden since 1855

NEW FOR 2024

Hygeia are now the sole distributor of the Thompson & Morgan range of seeds in Ireland. Established in 1855, Thompson & Morgan is an award winning seed range. These seeds will appeal to any gardener looking for a premium seed choice from a trusted brand.

THOMPSON & MORGAN HOUSE PLANT SEEDS

Create a plant paradise

- ✓ 11 varieties of houseplant seeds
- ✓ One of the fastest growing areas in horticulture
- ✓ One of the very few seed companies to offer house plant seeds
- ✓ Available as a 30cm stand

NEW
for 2024

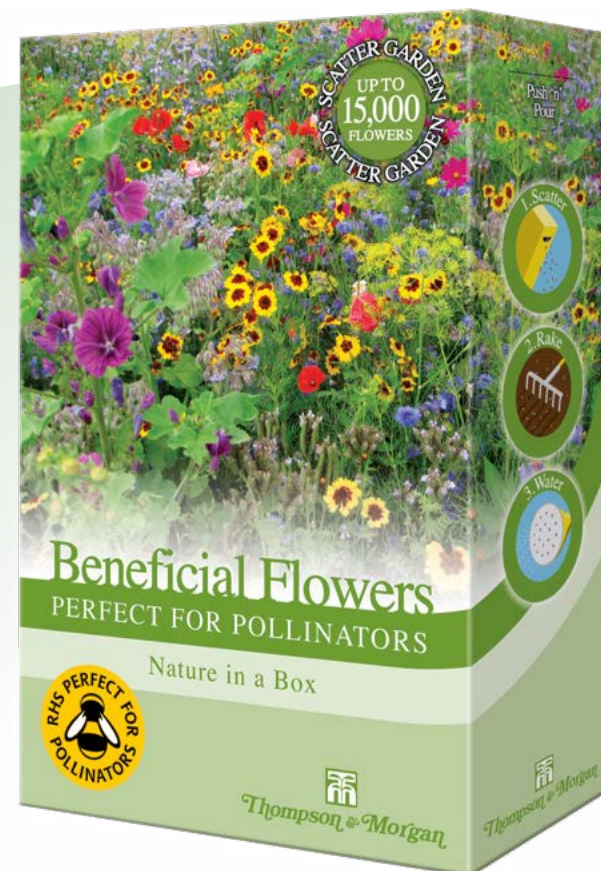

THOMPSON & MORGAN MICROGREENS SEED & GROW KITS

Healthy and easy to grow. Ready to eat in 10-14 days

- ✓ Range of 15 varieties and 3 microgreen grow kits
- ✓ Each grow kit features 5 packets of seeds, 5 pots, 5 compost discs, 5 plant labels and a pair of snips
- ✓ Appealing to both new and experienced gardeners
- ✓ Also available as a 30cm stand

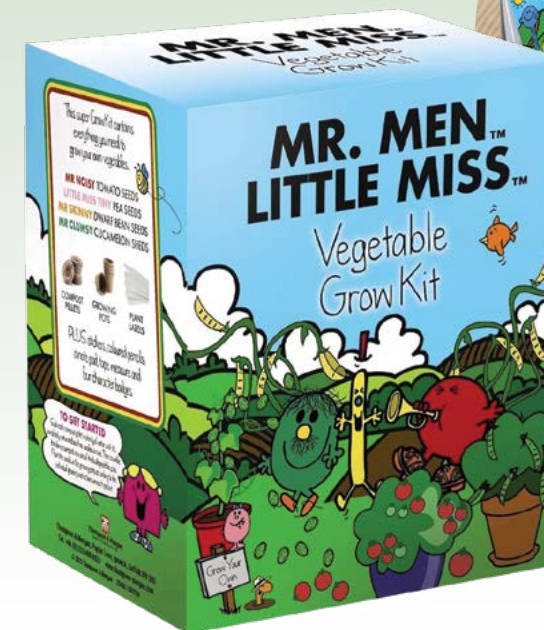

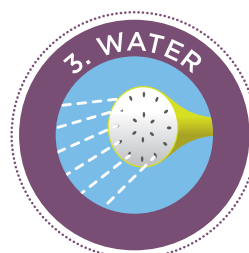

Why not showcase this range with one of our FSDU's to maximise impulse sales?

THOMPSON & MORGAN SCATTER GARDENS

Nature in a box

- ✓ A consistently popular range
- ✓ These scatter garden mixes are a perfect compliment to Thompson & Morgan's highly popular Wild Flower packet mixes
- ✓ 8 Varieties
- ✓ Supplied as 6 units per outer
- ✓ Unlike similar products containing generic spreading agents, Scatter Gardens are packed with vermiculate as a carrier
- ✓ Vermiculate absorbs nutrients and keeps them ready to slowly release as the seedlings require it

THOMPSON & MORGAN MR. MEN & LITTLE MISS GROW KITS

Encourage a new garden generation

EACH PACK CONTAINS

- 4 packets of seeds
- 4 starter pots, composts and labels
- 1 measuring tape
- 1 pack of 6 colouring pencils
- 1 drawing pad
- 1 set of stickers
- 4 Mr. Men character badges- one for each character featured on the seed packets

- ✓ Young gardeners will love these Mr. Men & Little Miss growing kits
- ✓ The kit contains 5 easy to grow flower varieties in bright packets each featuring one of the Mr. Men & Little Miss characters
- ✓ All seeds are large enough for kids to handle and will give quick results
- ✓ The kit contains everything the little gardener would need plus colouring pencils and a drawing pad so they can record each stage of growth

THOMPSON & MORGAN MR. MEN & LITTLE MISS TOOLKIT

Kids will love gardening with this toolkit designed for little hands

TOOLKIT INCLUDES

- 1 mini rake
- 1 mini spade
- 1 mini trowel
- 1 water sprayer
- 1 handy tool carry bag

THE EXPERTS IN PEST CONTROL

Hygeia distribute a selection of Rentokil pest control products. Rentokil is a well know brand recognised by almost anyone a known pest control solution. **This range would appeal to anyone looking for pest control solutions they trust to work.**

Single feed poison, so rodents do not need to consume as much bait as some other poisons

- ✓ Highly attractant pasta format
- ✓ Use within secure bait stations
- ✓ Contains 0.0025% Brodifacoum

RENTOKIL MOUSE & RAT KILLER PASTA BAIT

RENTOKIL RAT KILLER OUTDOOR PRE-BAIT BOX

Pre-baited rat bait station for outdoor use

- ✓ Contains 0.0025% w/w Brodifacoum, kills in one feed
- ✓ Bait box can be re-used, key included

HYGEIA AGRI & AMENITY

GOOD SPRAYING PRACTICE

Five metre minimum legal working distance from water courses

Keep Pesticides out of Water

- 1 Never exceed the maximum application rate.
- 2 Observe and obey the buffer zone (eg. MCPA has a five metre buffer zone).
- 3 Never fill your sprayer directly from a water course.
- 4 Do not perform filling operations near water bodies or where there is risk of run off into drains or wells.
- 5 Do not spray if heavy rain is forecast within 48 hours.
- 6 Never spray ground that is waterlogged.
- 7 Professional pesticides must only be applied by a trained professional spray operator.

There is a minimum 1 metre buffer zone for all pesticides.

PESTICIDE INFORMATION FOR THE USER IN THE FARM, HOME & GARDEN

Seek Advice

-  **Seek advice** before purchasing the product. Is it right for you?
-  **Read carefully** the text on the product label. Follow safety precautions and application conditions, such as dosage, prohibitions and the waiting time between last application and harvest.

When Applying

-  **Wear protective clothing** where it is required.
-  **Do not eat, drink or smoke** while using plant protection products.
-  Adhere to the **recommended rate** to protect environment and health.
-  Make sure to **protect the environment** when applying. Apply only according to label recommendations for timing, weather conditions etc. Ensure the pesticide does not get into surface water, ground water or the sewage system.

After Application

-  **Wash and clean** the equipment thoroughly.
-  **Dispose of** triple rinsed empty packages and remnants appropriately.
-  **Wash Your Hands** carefully with soap and water.
-  **Store the products properly.** Products in their original packaging should be kept in a secure cabinet at moderate temperatures. Do not store near food/feed. Take precautions to keep out of reach of children and animals.

GRASSLAND WEED CONTROL GUIDE

| PROBLEM | SOLUTION | MAX DOSE | WATER VOLUME | PACK SIZES | TIMING | SPRAYER | CROP | KNAPSACK RATE |
|---|--------------------|----------|-------------------|----------------|--|-----------------|-------------------------------|--------------------|
|  Docks | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | Late April/early May when they are 8" to 10" high or across, is a good time to spray docks when they are growing vigorously as there are plenty leaves on the dock plant and silage won't be cut for at least 30 days. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | HYFLUX | 2.0L/ha | 200-400L/ha Water | 1L + 5L | | Boom | Grassland | |
|  Soft Rush | MORTONE | 4.5L/ha | 200-400L/ha Water | 5L + 20L | Cut old brown rush. Then 6-8 weeks after spray the actively growing green rush. Use 200ml of Presto as adjuvant in the tank mix. | Boom | Grassland | |
| | AGROXONE 50 | 2.7L/ha | 200-400L/ha Water | 5L + 10L | | Boom | Grassland | |
|  Ragwort | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | Spray when the majority of plants are in the rosette stage and growing vigorously in the Autumn or Spring but before the flower spines start to grow. Common ragwort will require spraying over a minimum of 2 years for complete control. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | MORTOX 50 | 3.3L/ha | 180-270L/ha Water | 5L + 10L + 20L | | Boom & Knapsack | Grassland / Amenity Grassland | 240ml in 20L Water |
|  Thistle | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | Thistle, creeping (plants up to 50cm high). Spray in late Spring / Early Summer before flowering. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | MORTONE | 4.5L/ha | 200-400L/ha Water | 5L + 20L | | Boom | Grassland | |
|  Nettles | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | Spray when the majority of plants are in the rosette stage and growing vigorously in the Autumn or Spring but before the flower spines start to grow. Common ragwort will require spraying over a minimum of 2 years for complete control. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | HYFLUX | 2.0L/ha | 200-400L/ha Water | 1L + 5L | | Boom | Grassland | |
|  Buttercup | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | Best time to spray is in early spring (February to April), before it flowers and when the plant is small and actively growing. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | HYGRASS EXTRA | 3.5L/ha | 100-400L/ha Water | 5L + 10L + 20L | | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
|  Dandelion | MORTOX 50 | 3.3L/ha | 180-270L/ha Water | 5L + 10L + 20L | Apply in early Spring when actively growing just before Flowering or in Autumn. | Boom & Knapsack | Grassland & Amenity Grassland | 230ml in 20L Water |
| | HYFLUX | 2.0L/ha | 200-400L/ha Water | 1L + 5L | | Boom | Grassland | |

NEW SOWN LEYS

The Ideal
Mortone
Partner

HYGEIA
PRESTO

Superior, nonionic wetting agent, designed for water based pesticide applications in horticulture, industrial turf and forestry operations. Designed for fast spreading, uniform distribution, and absorption of spray on leaf and stem surfaces. May be used with most pesticides and fertilizer products.

- USAGE
- ✓ Ideal MCPA partner
 - ✓ Ideal adjuvant for all herbicides e.g. with Mortox for the control of ragwort or with glyphosate to increase efficacy
 - ✓ Superior non-ionic wetting agent

- BENEFITS OF THE PRODUCT
- ✓ Wetter, stickier and penetrant
 - ✓ Rainproofers
 - ✓ Contains a natural biodegradable waterproofing polymer
 - ✓ Rain fast approximately 30 minutes after spray has dried

FORMULATION

435 g/L Alkyl Polyglycoside natural plant extract

HYGEIA
PRISTINE

Pristine is a Spray Tank cleaning agent particularly useful when going from one type of application to another. Pristine is also useful in tank cleaning after the use of sticky Sulphonylurea.

- BENEFITS OF THE PRODUCT
- ✓ Excellent cleaner on all agrichemicals
 - ✓ Removes salt build up from nozzels
 - ✓ Keeping nozzles clean, improving accuracy of spraying, extending nozzle life

| | Presto | Pristine |

HYGEIA
FIELDMARK

An advanced spray pattern indicator, to assist spraying and also helps minimise drift. A new advanced spray pattern indicator formulated to provide the optimum conditions of liquid sprays to amenity turf, bare ground and grassland.

- ✓ An advanced spray patter indicator, to assist spraying and also to minimize drift
- ✓ Key to ensure full field herbicide application “no missed areas”
- ✓ Helps to ensure accurate application of sprays and particularly useful on bare ground by showing you where you have sprayed
- ✓ Blue Dye indicator
- ✓ Contains anti-drift agent
- ✓ Knapsack use and boom use. Please Note: Should only be used with herbicides in knapsack use when those herbicides are allowed for use in knapsacks.

| | Fieldmark |
|-----------|---------------|
| Pack Size | 1 Litre |
| Code | G60030 |
| Outer | 6 |
| Pallet | 80 |
| Barcode | 5390182300582 |

HYGEIA
MORTONE

Control of a wide range of annual and perennial weeds in grassland. Contains MCPA as a potassium salt at 300g/litre. The only potassium based MCPA on the market. Does not damage grass between rush. Use in conjunction with Presto for maximum benefit. Apply when there is good growth and sufficient leaf area on the weeds to absorb the chemicals.

FORMULATION

300g/L MCPA as Potassium Salt

USAGE

- ✓ Excellent control of soft rush and thistles
- ✓ Potassium salt which gives it 2 advantages
- ✓ Absorbed quickly providing improved rush control
- ✓ Not as harsh on grass during a warm summer
- ✓ Systemic and travels throughout the plant
- ✓ For best control cut and remove old growth and spray the soft regrowth when there is 15cm regrowth
- ✓ Alternatively the rushes can be cut 4-6 weeks after spraying. This will encourage the grass to thicken up around the rushes

RATE

Rushes 4.5L/hectare in 450L water or 3.2pt/ac in 40 gallon water

TIMING

- ✓ Rushes need active growth and soft leaf on the rush
- ✓ Spray Thistles when they are actively growing, just before flowering. They should be 8" high or across
- ✓ Keep livestock out of treated areas for at least 2 weeks
- ✓ Maintain buffer zone of 5 metres

HYGEIA
AGROXONE 50

A selective herbicide for the control of many broad leaf weeds and rush in established grassland with 500g/litre MCPA as the dimethylamine salt. Max application rate of 2.7 litres per hectare in 200-400 litres of water. Max number of applications per annum in established grasslands is 2. Ideally use in conjunction with Presto.

USAGE

- ✓ Excellent control of soft rush and thistles plus other weeds
- ✓ Dimethylamine salt
- ✓ Systemic and travels throughout the plant
- ✓ Does not hold back grass growth

RATE

- ✓ 2.7L/hectare in 200-400L water or 1.9pt/acre in 20-40 gallons water
- ✓ Keep livestock out of treated areas for at least 2 weeks
- ✓ Maintain a buffer zone of 5 meters

To protect aquatic organisms respect an unsprayed buffer zone of 5m to surface water bodies.

Contains **THREE** separate products:
Mortone Gold, Presto & Fieldmark
These products can be used in combination or separately.

HYGEIA THE RUSH & MEADOW BOX

Rush & Meadow Box is a 3 Product Combination Box Pack; containing 3 distinct products for grassland Rush spraying. It contains a 5.4L of Mortone Gold (750 g/L MCPA) and a 600ml bottle of Presto (4 function adjuvant) and a 1Litre bottle of Fieldmark (Spray pattern Indicator: Blue Dye).

MORTONE GOLD

Selective herbicide for the control of many broad-leaved weeds in established grassland. It contains the highest concentration of MCPA per pack on the market.

| Rush & Meadow Box | |
|----------------------|-------------------|
| Code | G60032 |
| Outer | 1 |

| Barcode | 5390182300605 |

PRESTO

Superior, nonionic wetting agent, designed for water based pesticide applications in horticulture, industrial turf and forestry operations. Designed for fast spreading, uniform distribution, and absorption of spray on leaf and stem surfaces.

FIELDMARK

An advanced spray pattern indicator, to assist spraying and also helps minimise drift. A new advanced spray pattern indicator formulated to provide the optimum conditions for the most accurate application of liquid sprays to amenity turf, bare ground and grassland.

HYGEIA HYFLUX

A selective post-emergence herbicide for the control of annual and perennial weeds, especially cleavers, common nettle and common chickweed in winter and spring cereals, maize and grassland. An emulsifiable concentrate containing 200 g/l fluroxypyr as the 1-methyl heptyl ester.

USAGE

- ✓ Excellent control of docks plus range of broad leaved weeds
- ✓ Systemic and travels throughout the plant

RATE

- ✓ 2L/hectare in 300-400L water or 1.4pt/acre in 30-40 gallons of water
- ✓ Knapsack recommendation 30ml/10L water to treat 330sq.m
- ✓ New Leys at a rate of 0.75L/hectare controls chickweed where clover is not important
- ✓ Keep livestock out of treated areas for at least 3 days

TIMING

- ✓ Docks should be 8-10" high or across
- ✓ Nettles should be actively growing before flowering, just right up to 12" high

FORMULATION

An emulsifiable concentrate containing 200 g/l fluroxypyr (equivalent to 28.6% w/w fluroxypyr-1-methylheptyl ester with an aromatic hydrocarbon).

| | Hyflux | Hyflux |

| Barcode | 5390182044349 | 5390182044295 |

HYGEIA
HYGRASS EXTRA

Suppresses Docks and Nettles and controls most other grassland weeds. Hygrass will control the majority of perennial broad leaf weeds in grassland, but patches of well established stinging nettles and docks will require a second spray when any re-growth has sufficient leaves. Creeping thistle, dandelion, sowthistle, horsetail, soft rush, plantain, daisy and most annual weeds such as chickweed and mayweeds are well controlled. Speedwell, ragwort and pineapple weeds are severely checked.

USAGE

- ✓ Excellent control of docks, nettles, thistles, buttercup, dandelion and chickweed
- ✓ Systemic and travels throughout the plant
- ✓ Does not hold back grass growth

RATE

- ✓ 5L/ha in 200-400L water or 3.6pt/acre in 20-40 gallons water
- ✓ Keep livestock out of treated areas for at least 2 weeks

TIMING FOR RAGWORT

- ✓ Docks should be 8-10" high or across
- ✓ Nettles should be actively growing preferably before flowering - Just right up to 12" high

FORMULATION

344 g/l 2,4-D and 120 g/l Dicamba as the dimethylamine salt

| | Hygrass Extra | Hygrass Extra | Hygrass Extra |

| Barcode | 5390182040464 | 5390182040471 | 5390182040518 |

HYGEIA
THE DOCKBOX

Hygrass Extra and New Hyflux are biologically compatible and if used in conjunction with each other they provide excellent control of docks and major broad-leaved weeds.

For difficult to control weeds, use Hygrass Extra at full rate (3.5L/hectare) and New Hyflux at half-rate (1L/hectare). For short term control or where weeds are not well established, Hygrass Extra can be applied at the rate of 1.75L/hectare in conjunction with New Hyflux at 0.5L/hectare. Use pesticides safely - read all instructions carefully.

HYFLUX

A selective post-emergence herbicide for the control of annual and perennial weeds, especially cleavers, common nettle and common chickweed in winter and spring cereals, maize and grassland. An emulsifiable concentrate containing 200 g/l fluroxypyr as the 1-methyl heptyl ester.

HYGRASS EXTRA

Suppresses Docks and Nettles and controls most other grassland weeds. Hygrass will control the majority of perennial broad leaf weeds in grassland, but patches of well established stinging nettles and docks will require a second treatment.

Contains **TWO** separate products:
Hygrass Extra & New Hyflux
These products can be used in combination or separately.

| | The Dock Box |
|----------------------|-------------------------|
| Code | G4052 |
| Outer | 1 |
| Pallet | 70 |
| Max Single Dose Rate | Up to 2 hectares / pack |
| Barcode | 5390182044998 |

HYGEIA
MORTOX 50

A selective weedkiller for grassland, golf courses and sports fields. Contains 500g / Litre 2,4-D. Systemic and selective weedkiller. Mortox 50 is especially suitable for the treatment of Ragwort. Treatment will normally kill plants at all stages of growth up to the early bud stage. It is essential that stock be kept off treated pastures until Ragwort and all poisonous weeds are completely dead and disappeared.

USAGE

- ✓ Excellent control of ragwort, creeping buttercup and dandelions
- ✓ Systemic and travels throughout the plant
- ✓ Does not hold back grass growth
- ✓ Amenity recommendation

RATE

- ✓ Ragwort 3.3L/hectare in 200-400L water or 2.4pt/acre in 20-40 gallons water
- ✓ Creeping buttercup 2.8L/ha in 200-400L water or 2pt/acre in 20-40 gallons water
- ✓ Keep livestock out of treated areas for at least 2 weeks or if poisonous weeds such as ragwort are present until they have disappeared

TIMING FOR RAGWORT

- ✓ Application must be made to actively growing rosettes

FORMULATION

500g/Litre 2,4-D. Amine

HYGEIA
dB PLUS
UNDERCLEAR

For the control of a wide range of broad leaved weeds in newly sown grass leys with clover.

- ✓ Spray when the majority of clover seedlings have one trifoliate leaf. With red clover, some leaf deformity may be observed but subsequent growth will be normal. Do not use on crops of clover to be taken for seed, nor on crops of established clover.
- ✓ Professional use Only
- ✓ Application by Tractor Mounted or Trailed Horizontal Sprayer
- ✓ One of the very few products for weed control in newly seeded grass/clover leys.
- ✓ Broad spectrum of annual and perennial weeds controlled.
- ✓ Please see Product Label for full use guidance

HYGEIA PREMIER AMENITY SELECTIVE

This product is a 3-active high quality broad spectrum selective weed control herbicide. It is specifically approved for amenity & managed turf. Premier Amenity Selective usually requires only a single application before significant results are seen. Apply when growth conditions are good.

Weed Situations:

Controls a range of annual weed and perennial weeds in amenity grassland & managed amenity turf.

Applicable Crop:

Apply when the weeds are actively growing and the soil is moist.

Weeds Controlled:

Dandelion; Buttercup; Plantains; Common mouse ear; White Clover; Birdsfoot Trefoil; Common Chickweed & Self-Heal at 5 L/ha. The more resistant weeds including well established perennials such as Daisy; Docks Creeping Thistle; Common Field Speedwell, Mayweed and Nettles benefit from the full dose at 6 L/ha

Following Crops:

Do Not Sow into soil treated with the Product for at least 3 months after application.

HYGEIA ANIMAL CARE

Hygeia Sheep Dip

Effective control of Sheep Scab & Blowfly Strike available from your local licensed merchant.

HYGEIA DIP USES

Timing, Treatment and Control of Blowfly and Sheep Scab. Sheep Sheep Scab (*Psoroptes ovis*) can be found throughout the year but in the main occur from October to March.

SHEEP SCAB

Sheep scab is caused by a tiny, pearly-white mite (*Psoroptes ovis*), just visible to the naked eye. Mites live on the skin surface, causing a skin allergy to their droppings. Initially the scab is very small (less than the diameter of 1 cent coin). As the mites increase in numbers the scab spreads, eventually covering the whole sheep. Mites can be found around the edge of the growing lesion/sore.

Sheep Scab Life Cycle

Scab mites live their entire lives on the sheep, introduced into a flock through contact or purchase of infested stock. Mites can however live off the sheep for 16 to 17 days in areas of scabby wool, clothing, housing, fence posts etc. or livestock transport.

Symptoms

Early disease is difficult to spot – animals look and behave normally. As the scab spreads the sheep becomes increasingly irritated, excessively rubbing and scratching and digging with their back legs. After about 10 to 12 weeks the scab covers the entire animal and the wool can fall out, revealing a dry, scabby skin beneath. By this time scab has spread throughout the flock making control costly.

Treatments

Sheep scab can be controlled in a single application by using a Diazinon based dip such as Hygeia Summer and Winter dip.

BLOWFLY STRIKE

Timing

The prevalence of blowfly strike is weather-dependent, with most cases of body strike occurring during periods of high humidity or warm periods after heavy rain. On the West and South West of Ireland strikes can occur any time between March and December. Breech strike depends less on weather as the moisture supplied by urine and/or scouring is sufficient for larval development.

Blowflies are part of the normal flora and fauna of your farm – they are there spring to autumn. Carcasses (small or large) and foot rot can increase fly numbers. Make sure all carcasses are disposed of and attend to infected feet as soon as possible.

What is it?

Larvae (maggots) of three species of fly commonly attack sheep: *Lucilia sericata* (the “greenbottle”), *Phormia terraenovae* (the “black blowfly”) and *Calliphora erythrocephala* (the “bluebottle”). These species are not totally parasitic and large numbers are associated with the environmentally useful tasks of faecal and carcass decomposition. A Strike can be classified as wound (usually feet), body or breech.

In body strike, flies are attracted to sheep by the odours of excessive “sweating” and/or decaying organic matter in the fleece, usually over the loins, shoulders, flanks, neck, back, throat or abdomen. In breech or tail strike, flies are attracted to fleece contaminated with urine and/or faeces and are particularly associated with scouring. Signs of strike include agitation and dejection, foot stamping, vigorous shaking, rubbing of the tail and breech. As infestation develops a distinctive odour is noticeable and the wool becomes matted and off colour. If the infestation remains untreated

the affected area increases and wool is shed from the centre, accompanied by signs of constant discomfort. Death will occur soon after.

The smell of infestation attracts further flies. If unchecked, extensive infestations of further waves of flies can result in a quick and painful death.

Blowfly Life Cycle

Adult flies can lay up to 3,000 eggs in 9-10 batches over a 3 week period. Eggs hatch within 24 hours if the fleece humidity is optimal. Eggs are continually being deposited on the fleece (even in hot, dry weather), but first stage larvae cannot survive in wool with a moisture content below 90 per cent. Later stages are less dependent on humidity. Total development can take 5-11 days on a carcass but only 3 days in body or breech strike or even shorter in a wound. Larvae leave the sheep to pupate in the soil and remain in the pupa for 3-21 days under summer conditions. Over-wintering pupae remain inactive until the soil temperature rises above 70°C.

Treatment of Existing Strike

Cure and protection can be attained using a diazinon based plunge dip such as Hygeia Summer Dip or Hygeia Winter Dip.

Hygeia Sheep Dip contains 10% Diazinon w/v. See packaging for safety information. Seek advice from prescriber before using. Legal category POM. For full product information including contra-indications, see SPC which can be found on the HPRA website. Use medicines responsibly. Manufactured and marketed by Hygeia Chemicals Limited.

HYGEIA PROSHIELD

Hygeia's ProShield Muscle Rub is a unique blend of Seaweed and cooling extracts Peppermint, Eucalyptus and Citronella.

This natural gel can be used as a soothing rub to aid wellness. Suitable for all types of stock including horses, dairy cows, beef cattle, sheep and pigs.

CONTAINS:

- ✓ Seaweed, peppermint, eucalyptus and citronella

HYGEIA POST MAGGOT OIL

Contains essential oils providing a soothing and moisturising effect. Used in sheep management after flystrike and maggots are a problem.

- ✓ Cleanses the affected area
- ✓ Easily applied by brush or spray
- ✓ Infused with the natural benefits of eucalyptus oil and citronella oil

HYGEIA PROBOOST MOLASSES

Premium quality Molasses offering a natural energy boost & palatable flavour

- ✓ Regarded as a natural feed ingredient for animals, molasses sweetens and increases the palatability of feeds.
- ✓ Comprising of sugars similar to that of forage crops, molasses enhances these feeds, with this being especially evident for hay.
- ✓ Described as a source of "fast energy", used in moderation, molasses is ideal for animals of a higher energy requirement.
- ✓ Additionally, molasses is a good source of potassium, a vital constituent for preventing deficiencies and abnormalities in young horses including reduced growth rate, appetite and hypokalemia.

MOLASSES BENEFITS

- ✓ High in digestible energy with a high content of easily fermentable sugars.
- ✓ High level of degradable protein.
- ✓ Highly palatable.
- ✓ Rich in mineral salts, present in a bioavailable form
- ✓ Ideal to compliment forage diets & improves palatability, increased dry matter intake & milk production.
- ✓ Adding sugary liquids like Molasses to rations/silage can reduce ration/silage sorting and as a result increase rumen efficiency and ultimately milk yield.
- ✓ Rumen pH is often found to increase, creating a more efficient rumen environment, resulting in increased fibre digestion and improved forage intakes.
- ✓ The addition of Molasses can lead to improved milk fat & protein.

Terms & Conditions

- The Seller shall not be bound by any terms or conditions whatsoever whether oral or otherwise except those set out herein and on the front hereof. No representative, agent or salesman has any authority to waive or vary any of these conditions.
- The prices shown overleaf may be increased at any time by the Seller by giving written advice to the Buyer, provided that such advice is received by the Buyer before delivery. If the Buyer considers any such increase in price, unreasonable he may, within 14 days of receipt of the Seller's advice, cancel this order by giving written notice to the Seller, provided that he shall not have already accepted the goods.
- The Seller shall not be responsible for any failure to deliver the goods sold nor for any delay in such delivery by reason of any circumstances not within the control of the Seller and the Seller shall be at liberty by reason of such circumstances to withhold, suspend or reduce deliveries to such extent as the Seller in its discretion may think fit.
- All express or implied conditions and warranties, statutory or otherwise, as to quality or correspondence with description or sample or fitness for any purpose of the goods are hereby expressly excluded. All recommendations and advice given by the Seller or its servants or agents to the Buyer or agents to the Buyer or his servants or agents as to the mode of storing, handling, applying or using the goods are given without liability on the part of the Seller or its servants or agents, and no responsibility will be accepted by the Seller for any injury, loss or damage whatsoever arising directly or indirectly from their storage, handling application or use.
- No claims for damage or shortages can be entertained unless written complaints are addressed both to carrier and Seller within seven days of delivery.
- Save with the written agreement of Hygeia Chemicals Ltd., the company is unable to accept the return of any goods supplied pursuant to orders received by it. In the event of the Company accepting returned stock there will be re-stocking charge of 25% on invoice value.
- The Seller shall not be responsible for any claims, demands, actions, causes of actions, suits, proceedings, costs, and expenses whatsoever for or arising out of or alleged infringement of patent trade mark or copyright on merchandise delivered by the Seller.
- If the rate of exchange of the currency agreed upon in the purchase contract and that of the vendor's or the purchaser's country should alter, both parties are entitled to withdraw from the contract as far as outstanding deliveries are concerned and/or insofar as an adjustment of the contract price corresponding to the variation in exchange rate is unacceptable to either party.
- Quotations do not include V.A.T. unless otherwise stated.
- In the event of war, fire, flood, strike, labour trouble, accident, mechanical breakdown of facilities, riot, acts of God, or contingencies beyond the reasonable control of the party affected, interfering with the production, supply, transportation or consumption to the goods covered by this contract, or with the supply of any raw material used in connection therewith, the quantity of goods provided for in this contract shall be reduced by the amount so affected without liability but the contract shall otherwise remain unchanged. Seller's decision as to what quantities are affected shall be final and binding.

RETENTION OF TITLE

- a) The ownership of all goods shall remain in the Company until such time as all debts due to the Company from the Customer have been paid. Until such time as all such debts have been discharged in full the Customer shall:
 - Store the goods so as to clearly show them to be the property of the Company;
 - Hold the goods and all monies received from the sub-sale thereof as bailee and trustee respectively for the Company; and
 - At the request of the Company furnish the Company with the names and addresses of debtor sub-purchasers and all appropriate particulars thereof so as to enable the Company to recover direct from such sub-purchasers and all appropriate particulars thereof so as to enable the Company to recover direct from such sub-purchasers sums owing by them.
- b) The risk in the goods shall pass to the Customer upon delivery of same to the Customer and the signature of any employee of the Customer on the delivery docket shall be conclusive evidence of such delivery.
- c) The Company referred to above in all cases is to be HYGEIA CHEMICALS LIMITED.
